TIPS ON SMART HOMES FOR SMART FOLKS

Wishing you a healthy and prosperous New Year. What a year! For so many of us, the economy seemed to be the plaque build-up that stopped the flow of blood in 2009. Many of us waited to see where the economy was going. After months of waiting, we decided to become a part of the economy recovery and started to invest in our business.

This past year, while the rest of

the world was busy watching the economy, we were busy expanding our business—bringing to it a new level of **service, convenience, and quality**. By expanding our space and joining forces with our suppliers we have opened up a larger showroom. We offer the latest in home improvement products and services in one convenient, comfortable location. We are your new

distributor for appliances, custom cabinetry, granite, marble, travertine, countertops, lighting, plumbing fixtures, fabrics (to mention just a few of our offerings). All this and more in one beautiful, convenient location:

**401 S. Sherman St. #209
Richardson, TX**

Please stop by for a cup of coffee and to browse our selections

**20% off Closets by Euro
until 3/31/2010**

Over the years, the Master Bedroom has become a Master Suite or Master Retreat, the Master Bathroom is now a Spa Retreat, and the Master Closet is a Dressing Suite! Why the change in names? To communicate the change in looks, design and feel. More emphasis is placed on the rooms we spend the most time in, and thereby rewarding the home-owner with a wonderful experience in their morning and evening routines.

If you have a Master Closet that is longing to become a Dressing Suite, this Spring may be the time to upgrade! EURO is helping clients replace poorly designed, boring white closets, with beautiful, smartly designed, furniture-look closets! For more information please call us, or schedule your appointment today.

SMART HOME TIPS

AFTER THE FIRE AT THE NEWMAN HOME THIS PAST DECEMBER, WE DECIDED TO CREATE A “SMART HOME TIPS” SECTION, WHERE YOU WILL BE ABLE TO FIND A MULTITUDE OF HOW-TO'S TO PROTECT AND MAINTAIN THE YOUR HOME.

Tip #1:

If your home has a hot water tank that is 9+ years old, it is time to replace it! The life expectancy of a typical water heater is 10-12 years, however we have found many that fall apart during year nine. If this happens, the bottom of the heater breaks away (due to corrosion) and the water in the tank spills throughout your home. The broken heater continues to spill water keeps trying to fill the “bottomless” tank. After a few hours, you have an indoor pool! Replace the water heater with a tankless unit and never worry again about the

tank falling apart and flooding your home.

Tip #2:

Always use qualified, state-licensed professionals for your home repairs and make sure they are insured just in case the unthinkable happens. to cover the unthinkable in your home. This includes electrical work, plumbing repairs or replacements, and any service to your HVAC equipment.
