

LAP PAD INSTRUCTIONS

July 2008

Cut 2 pieces of woven fabric or flannel 15" x 15". Round the corners of one piece. You can use woven fabric for the top and flannel for the bottom.

Cut 1 piece of 4 oz. batting slightly larger.

Lay batting down first.

Next lay square piece on top of batting right side up.

Lay piece with rounded corners on top with right side down on top of other two layers.

Stitch all 3 layers together using 1/2" seam allowance leaving an opening for turning.

Trim even with top piece. Turn right side out. Slip stitch opening closed.

Lay on flat surface and smooth as much as possible. Do not iron.

Top stitch all around 1/2 to 5/8" from edge.

Top stitch large X from corner to corner as shown in diagram.

Make sure to backstitch at beginning and end to secure thread.

This should produce a finished size of 14" x 14". Since we package these items in plastic bags anything larger than this does not fit.
