

Reduce the Worry that Comes with Caring For a Loved One at Home

Caregiver Communicator

“There’s no more worrying when I’m not in the room. I feel like I have my life back. This has been great for both of us.”

The new SafePresence™ Caregiver Communicator helps reduce the anxiety that comes with providing care at home.

It’s a portable handheld device that provides a continuous two-way audio link with the person in your care.

The SafePresence™ Communicator is always on. Communication is immediate. Carry on a conversation almost anywhere in the home as if you were in the same room.

No more shouting down the hall or extra trips up the stairs. No more trouble sleeping at night. Experience the peace of mind that comes with being in touch and connected.

- ***Freedom to Perform Daily Chores***
- ***Sleep Well Knowing You’ll Hear a Call for Help***
- ***Know What’s Going on Without Needing to Hover***

The Caregiver Communicator is one of the first products designed specifically to improve communication at home. It assists anyone who cares for:

- Elderly people with limited mobility
- A person recovering from recent surgeries or hospital stays
- Hospice patients
- Children or adults with autism or special needs
- Anyone confined to a wheel chair or with other physical challenges
