

Why Outsource??

Economic pressures have forced professional firms to think hard about ways to increase profits and be more competitive in the marketplace. The changes in technology and globalization have made it feasible for architects, engineers, owner-builders, and contractors to succeed in this competitive economy by leveraging outsourcing. Firms that take advantage of outsourcing are well positioned to be competitive and innovative.

Peace of mind

Our CAD TEAM is not just highly skilled in CAD, they also have an in-depth knowledge of building services so they provide practical, workable solutions. Drawings are produced whether to our own existing standards or to the standards you specify and are delivered within pre-agreed time-scales to suit even the fastest of fast-track projects.

We guarantee 99.99% accuracy in the final output.

Mission Statement

" To provide a design service that achieves total customer satisfaction.; To ensure principles that are effective through quality and productivity; To gain trust through responsible initiative in cooperation of your needs. "
