

EQUINE RANGE

Pony Maintenance Cubes

Pony Maintenance Cubes are cost effective base feed for all types of horses and ponies. It is a low protein, low energy, high fibre feed which is excellent for maintaining body condition in horses and ponies.

Features

Benefits

Nutritionally balanced ration	> Meets the protein, energy and mineral requirements of horses when combined with quality roughage
Easy to Feed	> A great base feed for horses and ponies in an easy-to handle pelleted form
Highly digestible energy sources	> Provides energy without heating effects
Easy to Store	> 25kg packing makes for easy lifting and storage
Maintenance energy and protein levels	> Energy and protein levels for maintaining body condition
Cubed feed	> Easy to feed out. Reduces dust and prevents wastage
High Fibre	> Similar fibre content to oaten hay
Cost Effective	> A very economical feed
Raw material receival standards	> High quality and safety of ingredients

NUTRITIONAL ANALYSIS

Nutrients	As fed basis
Crude Protein (min)	10.0%
Digestible Energy (min)	9.0 MJ/kg
Crude Fibre (max)	20.0%
Added Salt (max)	1.0%
Calcium (min)	0.8%
Phosphorus (min)	0.4%

INGREDIENT SELECTION

Lupins, barley, cereal straw, cereal byproducts, vitamins & minerals.

FEEDING DIRECTIONS

Pony Maintenance Cubes are a low protein, low energy, high fibre feed. They should be fed in conjunction with good quality roughage in the form of hay, chaff or pasture.

Clean, fresh water should be available at all times.

Feeding recommendations (light work)

Body weight	300kg	400kg	500kg
Pony Maint Cube (kg)	0.5-1.5	2-3	3-4

The above table is a guide only and the amount fed should be adjusted according to the horse's age, temperament, condition, bodyweight and exercise. The amount fed should be divided into at least two feeds daily.

Pony Maintenance Cubes should be introduced slowly to the diet over a period of 7-10 days.
